

Spitch Video-conferencing Platform

The next step in videoconferencing with all the features you were missing before, during and after the meeting

Business benefits:

- The video-conferencing platform offers a fully configurable virtual meeting space with your company logo, brand colors, URL and a multi-language interface.
- Fully functional meeting rooms for every use case with some features not available from other providers.
- Conversational AI integration-ready (lets your business be prepared for the future).

Selected features

Before the meeting:

- Scheduling
- Calendar invitations
- Date finder
- Book me
- Meeting calendar

During the meeting:

- Audio and/or video
- Shared whiteboard
- Documents sharing
- Chat
- Screen sharing
- Meeting minutes
- Private notes

After the meeting:

- Meeting summary email sent to participants
- Access all documents of current and past meetings

Types of meeting rooms

Team meeting

for up to 5 end-to-end encrypted video participants for effective teamwork

Boardroom meeting

for up to 30 video participants. Options for recordings and call-in by landline are available

Confidential meeting:

maximum privacy or off-the-record meeting for up to 5 end-to-end encrypted video participants suitable for lawyers, investors, doctors, psychologists, etc.

Classroom meeting:

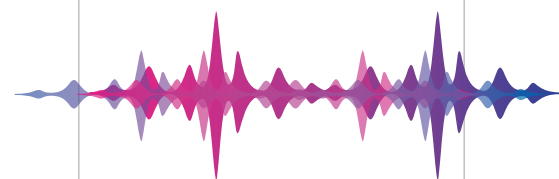

Up to 3 video presenters and 50 visitors, options for recordings and call-in by landline are available

Meet me:

private one-to-one video calls

Potential for future development:

- Meeting minutes are created automatically by a speech transcription tool and sent to participants in a "summary". Copy/paste or drag and drop content easily into the final meeting report while meeting is in progress, or let it be created automatically to review later.
- The use of Speech Analytics and other components of the Spitch¹ Omnichannel Conversational Platform ensures precise extraction of relevant content from the conversation for minutes taking and meeting reports.

SPITCH

Spitch is a global provider of B2B and B2C Conversational AI solutions, headquartered in Switzerland since 2014 with a presence in many countries across Europe and North America. Spitch helps enterprises to better understand and serve their customers through the use of Natural Language Processing (NLP), Artificial Intelligence (AI) and Machine Learning.

Technology:

- Participants may join via a simple browser link.
- Seamlessly integrated into your processes and infrastructure with custom-made WebRTC – cutting-edge web technology for secure real-time communication
- No software installation needed – scalable SaaS cloud platform is used. Optionally, the solution can run in your data center.
